

## Flight Animation Leaders

- The platform of choice among air safety investigators from government and aircraft OEMs
- Includes lumina|2d core plot/list module
- Ideal for detailed single-flight deep dive analysis (same tools as the safety investigation community)
- Desktop and web-based technology allows interactive sharing
- 3d visualization leverages Cesium (web-based) and X-Plane (desktop)
- Unique user community (leading experts from authorities, aircraft manufacturers and operators)

---

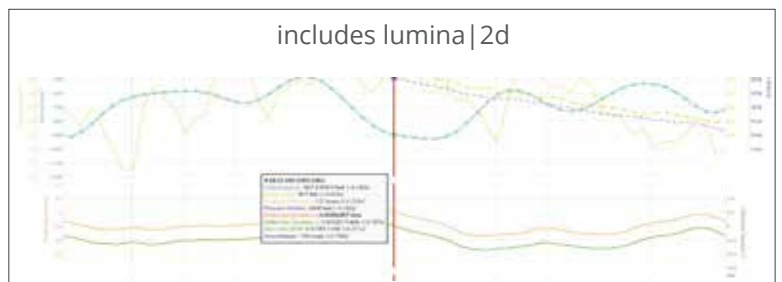

Advancing Aviation Safety & Efficiency  
*through innovative technology*

We did the world's FIRST animation (1986)

## Key Differentiators:

- Replica instrumentation are the same displays used by the aircraft OEMs
- Investigation display in addition to cockpit replica instrumentation works for all aircraft types for initial deep dive diagnosis
- Can be used for secure pilot debrief immediately after a flight (web version)
- Real-world terrain, visibility, sun angles (time of day)
- Integrated audio transcript/subtitles
- Auto-event import/synchronization with lumina | fda
- User customizable for diverse investigation
- Georeferenced Jeppesen charts
- Supports simultaneous multiple aircraft
- Data-driven synthetic audio
- Fixed and rotary wing
- One-stop shopping: we are approved AMO for annual regulatory maintenance readouts

Product Rebranding/Mapping (for existing users)
