

Data Analytics Like Never Before

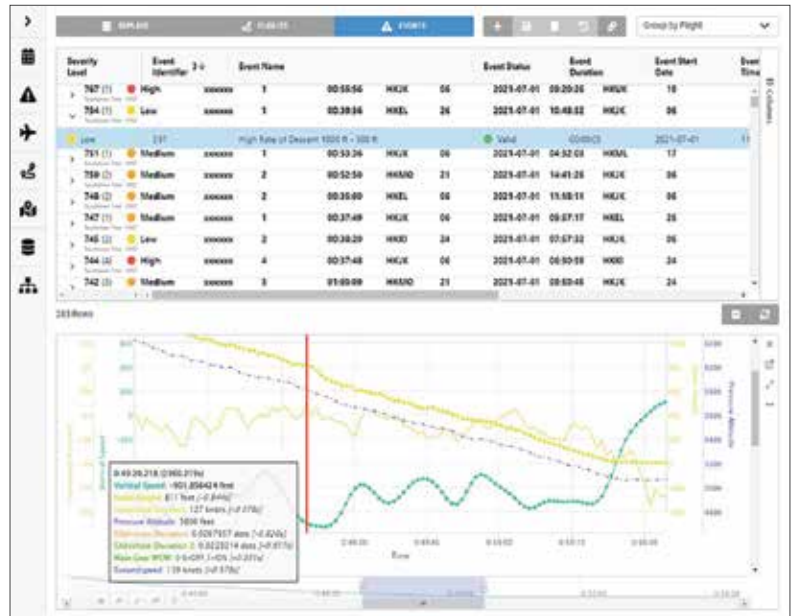

- Retrospective/query capability without reprocessing
- Web-based technology for ultimate user flexibility
- Integrated configurable real-time dashboards
- Operational Subject-Matter-Expert support (SME Days)
- Integrated deep dive investigation tools (same tools as the safety investigation community)
- Optional fuel/efficiency cost savings module

Advancing Aviation Safety & Efficiency
through innovative technology

Key Differentiators:

- Automatic notifications and dashboards based on user profiles
- Engage our operational flight data experts (ATPL, aerospace & performance engineers) to augment your team using SME Days
- User interface to define events without programming
- Unlimited number of users with configurable user roles/permissions
- Open architecture database for integration and connectivity
- Auto validation feature
- Integrated airport database regularly maintained
- Integrated METAR reports on take-off and landing (NOAA)
- Automated data transfer (for wireless-equipped aircraft)
- Fixed or rotary wings
- One-stop shopping: we are approved AMO for annual regulatory maintenance readouts

Product Rebranding/Mapping (for existing users)
